

Welcome

Welcome to the first public information meeting for the Route 5 and New Osborne Turnpike Improvements Study. We're glad you're here.

Study Description

The County of Henrico is conducting a study to evaluate necessary safety and operational improvements along Route 5 and New Osborne Turnpike corridors. The County is conducting this study in partnership with the Virginia Department of Transportation (VDOT) and the City of Richmond. The purpose of this study is to determine a preferred alternative for multimodal improvements that improve traffic operations and safety along the corridor. This study will also incorporate analysis and findings from adjacent studies.

Public Information Meeting

Thank you for attending our interactive public information meeting. Please feel free to speak with one of our technical specialists, participate in the mapping activity, and share your thoughts on the corridor.

Online Interactive Map and Survey

In addition to the mapping activity, the QR code below will allow you to navigate to the online interactive map and survey. Your feedback is key to informing the study team's understanding of the issues and opportunities faced by those who travel the corridor. Thank you for your participation.
